PROFESSIONAL PROFILE

Ambitious and results-driven Software Engineering student (6th Semester, CGPA 3.22/4.0) with hands-on full stack development experience gained through a professional internship at Eziline Software House, working in an Agile environment with Jira for sprint planning and bug tracking. Skilled in Java, JavaScript, HTML5, CSS3, and SQL, with practical exposure to Figma, Appium, MS Project, Wireshark, and Confluence. Delivered several enterprise-style projects spanning ERP, LMS, and POS systems, and committed to writing clean, scalable, maintainable software.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — Eziline Software House, Rawalpindi

- Developed and deployed full stack web application features end-to-end in a live production environment.
- Used Jira daily for Agile sprint planning, user story writing, task tracking, and bug reporting.
- Participated in daily stand-ups, sprint reviews, and team retrospective meetings.
- Integrated RESTful APIs, built responsive front-end UI components, and managed relational databases.
- Followed professional development practices including Git version control, branching strategy, and code reviews.
- Collaborated with senior developers to deliver features on schedule within sprint deadlines.

KEY PROJECTS

- Enterprise Resource Planning System (ERP) — Full stack web application covering core business operations modules.
- Learning Management System (LMS) — Full stack web application for course delivery and student management.
- Point of Sale System (POS) — Full stack web application for retail transaction and inventory management.
- Train Reservation System — Built in Java using object-oriented design and data structures & algorithms.
- Hotel Management System — Java application demonstrating object-oriented programming principles.
- Virtual Event Management App — Figma prototype with user persona research and UX/UI design.
- Pet Care Website — Responsive site built with HTML5 and CSS3.
- Furniture Website — Responsive site built with HTML5 and CSS3.
- Delivery Process Webpage — Responsive HTML5/CSS3 page with custom UI design.
